Location

Often described as 'Australia's Galapagos', Kangaroo Island is known for its prolific wildlife and natural beauty, offering a rich concentration of iconic Australian experiences in a compact area. Located off the coast of South Australia's Fleurieu Peninsula, Kangaroo Island (or 'KI' as the locals call it), is celebrated for its pristine natural environment, stunning coastal landscapes, abundant natural wildlife and artisan food and produce. At 155km in length and about 4500 square kilometres in area, KI is Australia's third-largest island, just 15km from the mainland. Native Australian animals including kangaroos, koalas, wallabies and echidnas can all be found in abundance, while marine mammals such as sea lions, seals, whales and dolphins make their home in surrounding waters. With twenty-one national and conservation parks, Kangaroo Island is widely known as a 'zoo without fences'.

Climate

A year-round destination, Kangaroo Island's climate is as dynamic as the scenery – from season to season the island yields fresh perspectives. The Mediterranean climate produces warm summers and temperate winters. Daytime temperatures range from 25-35°C in summer (Dec-Feb) to 14-18°C in winter (Jun-Aug).
